ARCTIC 28 Responder

This boat can be used as a military patrol boat or for adventure tours in harsh conditions. Safety of the crew is our main concern so the boat is unsinkable and extremely seaworthy.

The material used in our boats is HMWPE, High Molecular Weight Polyethylene, which is a durable polymer. The abrasion resistance of this material is superior and is suited for rough use and also for oil spill recovery. The sea keeping characteristics of our boats resemble the characteristics of RIB boats.

The boat interior is spacious thanks to D-shaped fenders. Unlike RIB boats the pontoons of the RBB (Rigid Boyancy Boat) boat never loosen up or flatten, making the boat safe and resilient. The RBB boat has a very low life cycle cost compared to other boat types due to the reduced need for repair and overhaul.

This boat has a light GRP Divinycell sandwich console that can be customized to your needs. There is room for a toilet or plenty of storage space.

Equipment

Steering servo, Radar, 2x plotter, 3D echo sounder, AIS, VHF, Toilet, etc.

Specifications

Overall length	8,9 m (28 ft)
Beam	2,6 / 3,1 m
Draft to props:	0,64 m
Weight	2500 kg
Capacity	18 persons
Fuel capacity	560 L
Construction	HMWPE
Classification	B - OFFSHORE
Max speed	50 kts
Outboard engines	2x175-250 hp

Specifications may be changed without prior notice.
